PISM

(Passenger Information Search Module)

PISM –Safely and Secure system of Passenger Information Search and Accumulation.

PISM –Complex solution for search and accumulation data of departed / arrived passengers.

PISM – Consist of search module and several plug-in databases including:

- 1. Own Database FLOWN – departed and arrived passenger database.**
- 2. External Database WANTED – database of wanted persons.**
- 3. External Database TAX DEBTORS – data base of tax debtors and etc. to whom travelling abroad should be restricted**

Ability to connect unlimited count of Database to System.

Support of Secure Web-Client for land/sea and other border control points.

PISM is Free Option for UDPS Customers *

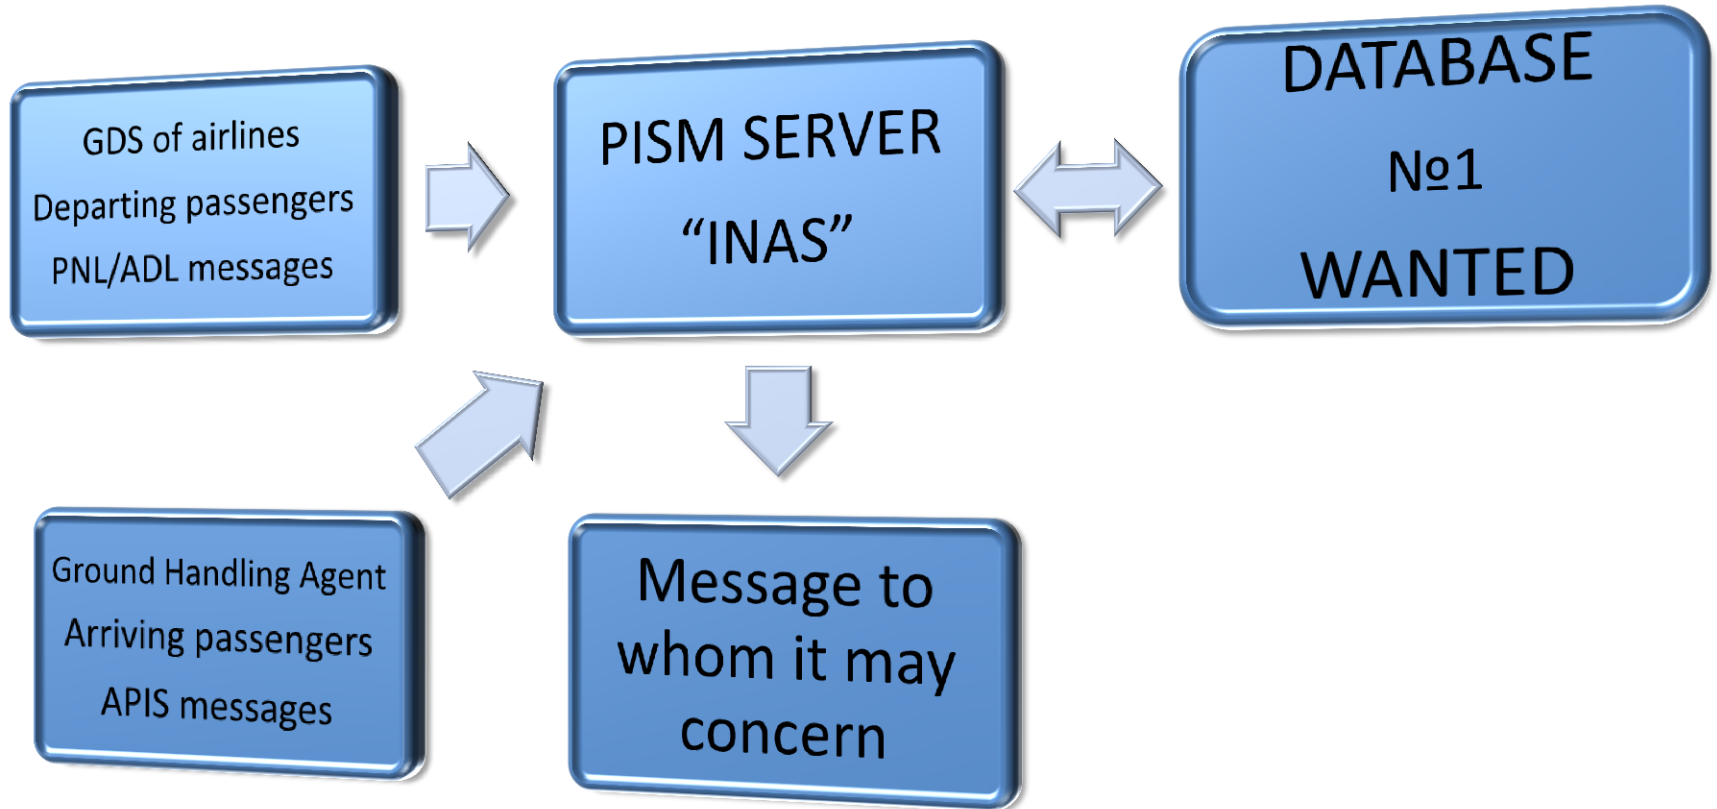

Supports immediate and confidential notification of positive matches to unlimited numbers of addresses to whom it may concern.

Data Exchange Between UDPS PISM Module or PISM Web Module and Server is encrypted and protected by SSL.

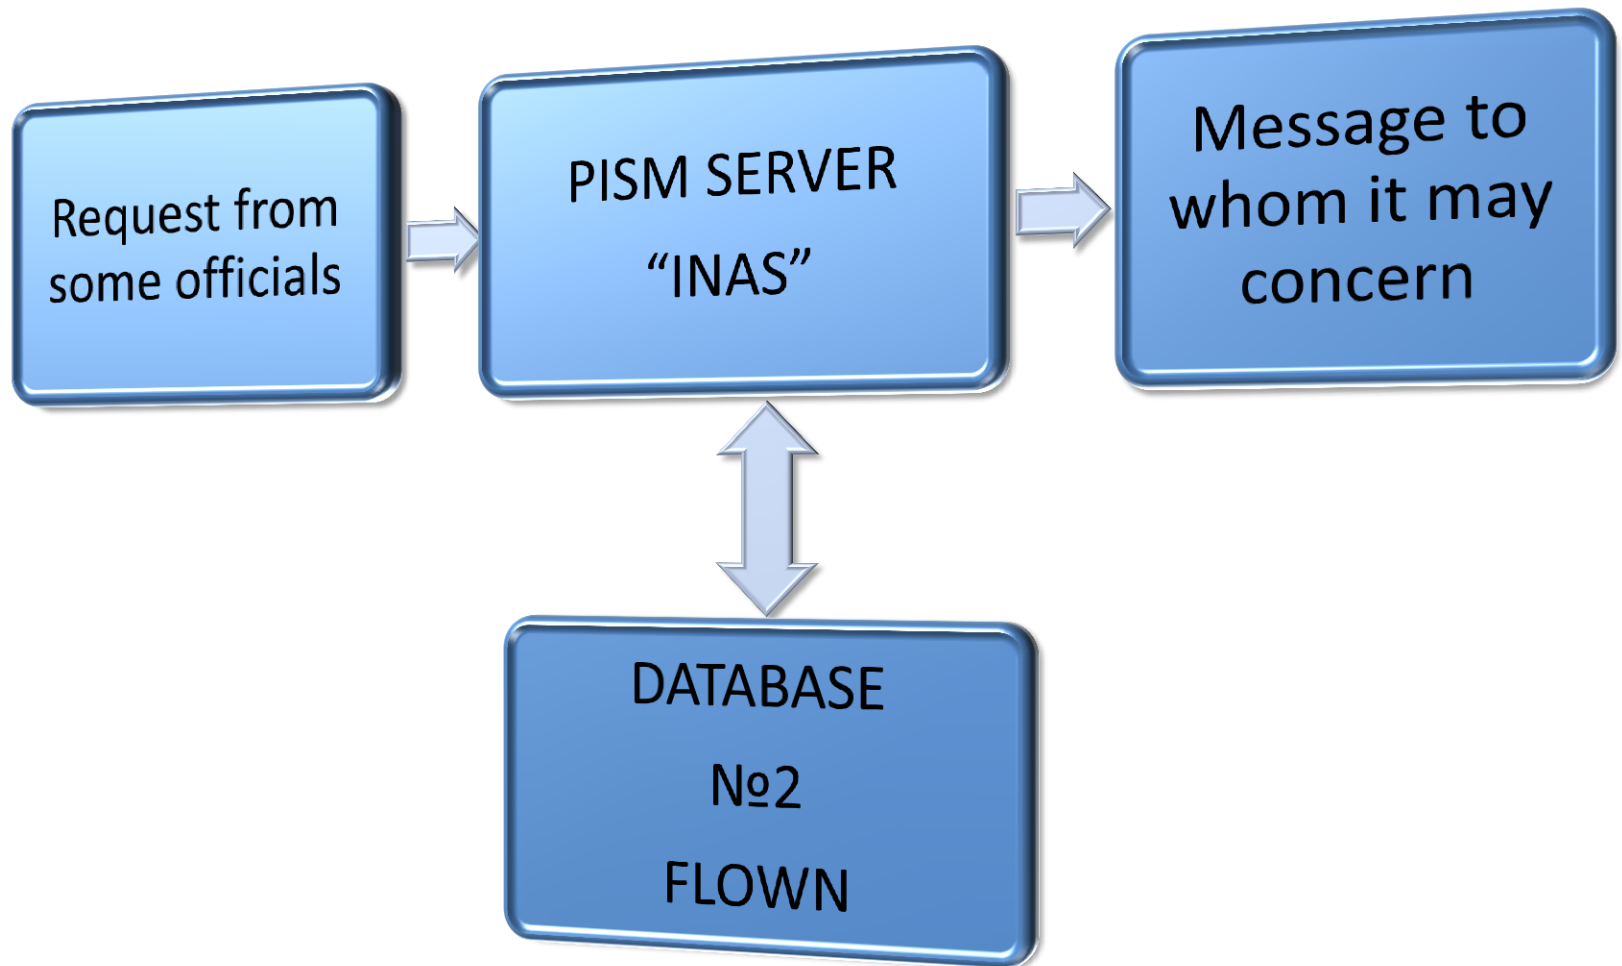

Oracle/Microsoft and other products are NOT used as Database Management System, which may be limited for usage due sanctions and broke work process.

*** Only For UDPS Customers**

NIKA LINK

NIKA LINK- SAFETY / EASY / FREE *

NIKA LINK- global professional network for safe and affordable data transfer

How to safely send data of your passengers? How to safely get data from airlines and airports?

How to simplify the procedure of sending and receiving data of your system?

NIKA LINK- your decision !!!

ISSUES

Air transport industry companies needed application software to communicate with the external community.

Cost

The cost of using existing or developing new communications interfaces is very enormous. Our solution is very affordable

Complexity of communication

Complicated procedures and administration of any changes in the system at the request of the airport or airline, providing technical support which often leads to a delayed response to emerging errors.

Complexity of integration

Most of existing Software integration resources are scarce

Data secure

Air transport industry companies are located worldwide and always need keeping data secure.

SOLUTION

NIKA LINK give you just special e-mail address and access to gateway NIKALINK mail server by simple suite of standard tools.

NIKA LINK can be reached at any place at any time without any limitation. You feel full secure of your data, forever!

NIKA LINK can deliver communications to any application that creates or consumes content.

NIKA LINK supports any types of messages recommended by IATA

Once configured, the **NIKA LINK** runs in unattended mode.

The **NIKA LINK** has self-monitoring features and is supported by **Zamar AG** product specialists 24/7.

BENEFITS

Provides access to **NIKA LINK** without custom development.

Free and easy installation

Can support multiple software applications on customer LAN.

Keeping data of your passengers secure and confidential

NIKA LINK is free of charge for NIKALINK users

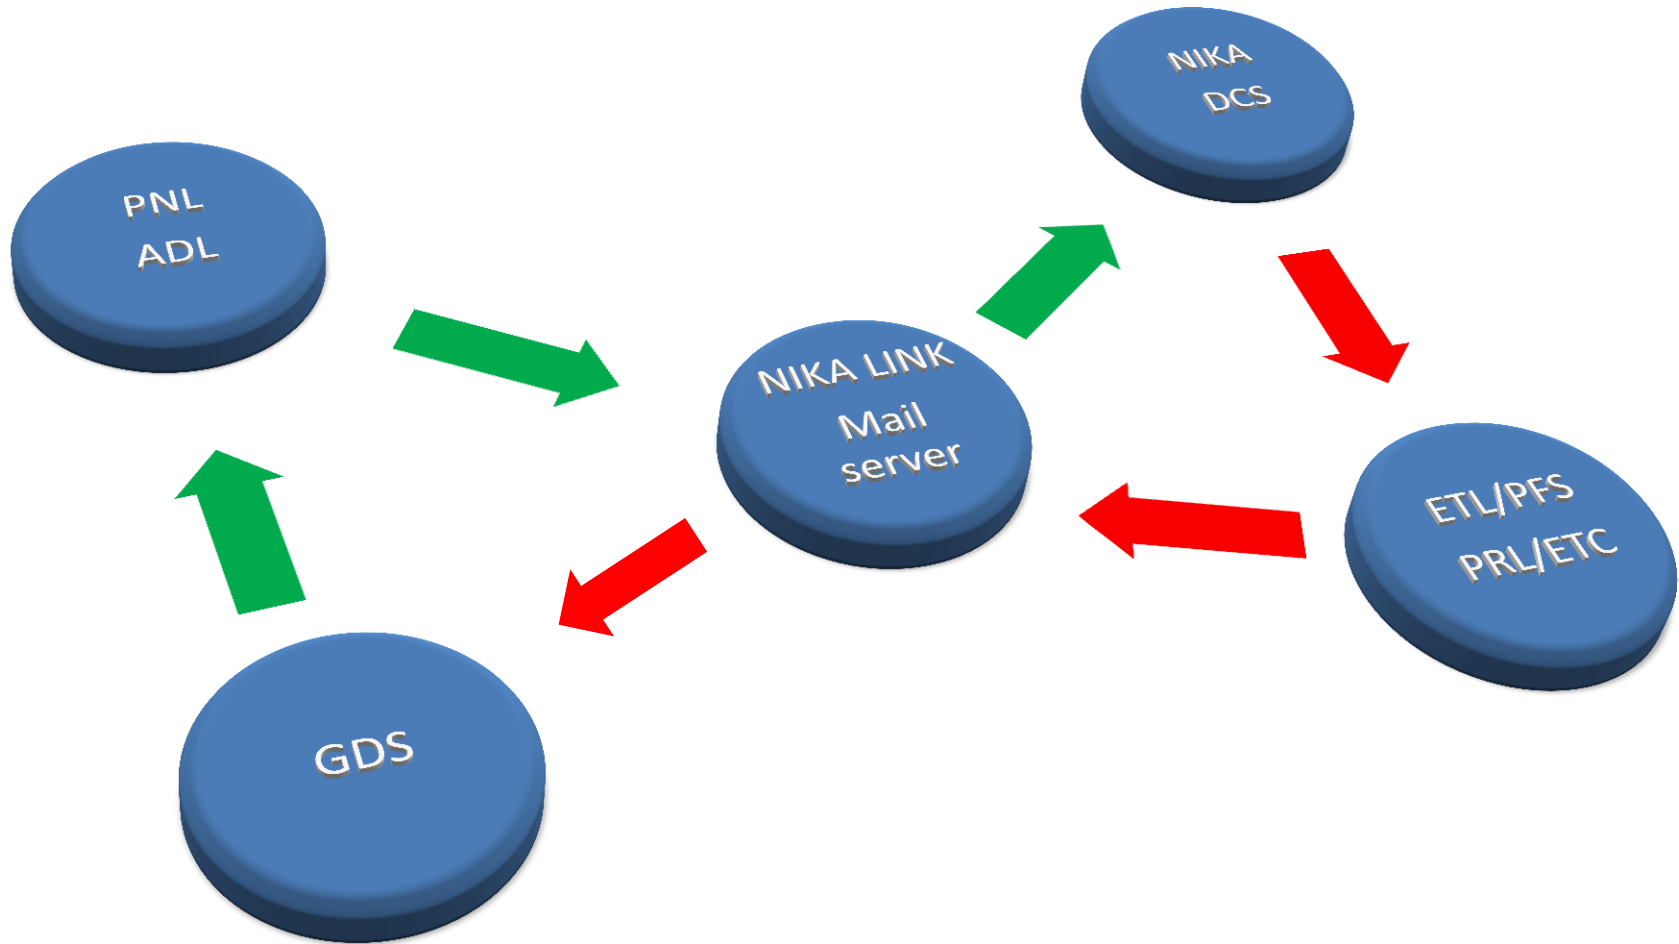

NIKA LINK make you on-line worldwide anytime, anywhere

NIKA LINK does not require changes to, or programming of, the applications it services.

* for NIKALINK users

NIKA LINK- SAFETY / EASY / FREE *

HOW DOES IT WORK

YOUR CHOICE – OUR SOLUTIONS

Compact - Small, lightweight, easy to transport, regardless of external factors and finally a stylish design.

Affordable - Upgrade your airport at minimal cost.

Hi-Tech - With our technologies your airport will rise in line with the leading airports of the world.

Our company is ready to provide the system free of charge for a period up to 30 days for making tests and independent evaluation by all users starting from the airport management, IT staff to check-in agents and etc.

- We are ready to install the UDPS on several check-in counters; Parallel to the existing system that will allow you to compare functionality and ease of use;
- Send experts for installation, training and technical support for the entire duration of the test;

***WE LOVE OUR WORK AND DO OUR BEST TO ENSURE THAT EVERY
PASSENGER REACHES DESTINATION IN SAFETY AND COMFORT***
